Would Genetic Counseling Be Helpful for Me? If you answer yes to any BRCA-Related Cancer: Risk Assessment, Genetic Counseling, and Genetic Testing. This opportunity for public comment expired on March 18, 2019 at 8:00 PM EST. Note: This is a Draft Recommendation Statement. Clinical practice guidelines recommend that BRCA mutation testing begin with a relative with known BRCA-related cancer, including male relatives, to determine if a clinically significant mutation is detected in the family before testing individuals without cancer. If an affected family member with a BRCA-related cancer is not available, then the relative with the highest probability of mutation should be tested. Management of BRCA mutations to reduce risk of future cancer is beyond the scope of this recommendation statement. Cancer Genetics Counseling. Understanding Your Risk. And Options. Driving and Public Transportation. For detailed directions visit www.sibley.org. Paid parking is available on the Sibley campus. The cornerstone of genetic counseling at Sibley is a personal consultation with Reem Saadeh, MD, an experienced clinical geneticist whose mission at Sibley is providing education and support. Working in a soothing environment at an unhurried pace, Dr. Saadeh explains the science of genetic testing. She reviews family medical history with special attention to incidence of cancer. She answers questions and she listens.
