We investigate how intellectual property rights (IPR) enforcement against developers and users of open source software (OSS) affects the success of related OSS projects. We hypothesize that when an IPR enforcement action is filed, user more. We investigate how intellectual property rights (IPR) enforcement against developers and users of open source software (OSS) affects the success of related OSS projects. The volume shares the (today) common idea that a conceptualization of Indigenous knowledge and culture as “intellectual property” is essentially an inaccurate one. With specific reference to Yolngu people of North-East Arnhem Land more. Across the cultures, knowledge about use of medicinal plants exists in the form of local folklore available with families, tribes and cultures, handed down from generation to generation. Some of this knowledge also exists in written form as well, but is difficult to interpret due to the local script used. Due to this improper and unstandardized documentation of traditional knowledge, patents are often granted to parties who are traditionally not the owners of this knowledge, thereby, leading to conflict in trade interests of the parties involved. Trade Related Intellectual Property Rights. Indian Patents Act, 1999. Convention on Biological Diversity. Gupta, Anil K. (Sept, 2001). Donders states: [Cultural rights] have been poorly elaborated in terms of content and scope and often neglected in terms of implementation. To be sure, Article 27 is not only about issues of intellectual property; the theory of the right to science and culture that I offer below has implications for many areas of law and policy, ranging from education to Internet governance. The conflicts between the right to science and culture and modern IP laws, however, are particularly stark.
