Heart: A Natural History Of The Heart-filled Life

Gail Godwin

50. Second natural history study of congenital heart defects - Circulation 1993. If 25 yr survival is 87% in medically managed pts, 64.5% deaths are cardiac, 35% sudden deaths, 3.3% due to IE, 35% due to CHF and 27% due to unspecified cardiac cause. In pts who underwent surgery, 89.8% deaths are cardiac, 6.3% peri-operative, 39.2% sudden, 24% CHF, 30%. The clinical course is especially poor when coarctation of the aorta elevates systemic systolic pressure, which augments Heart by Gail Godwin, February 1, 2002, Harper Perennial edition, in English. In the chronicle of our species, ever since we acquired speech and symbols, the imaginative place accorded to the heart can tell you a great deal about how a people defines itself and what it holds sacred.
