Evaluations of the Traditional Marxist Perspective on Education. Positive. There is an overwhelming wealth of evidence that schools do reproduce class inequality because the middle classes do much better in education because they have more cultural capital (Reay) and because the 1988 Education Act benefited them (Ball, Bowe and Gewirtz). Conversely, WWC children less likely to go to university because of fear of debt (Connor et al). The Role of Schooling in Perpetuating Educational Inequality: An International Perspective. Please join the American Institutes for Research for a presentation and discussion on research by Bill Schmidt and others using data on mathematics achievement from the Program for International Student Assessment (PISA) 2012. The Teaching and Learning International Survey (TALIS) is an international comparative study of teachers, their working conditions, and the learning environment in schools. TALIS is organized by the Organization for Economic Cooperation and Development, and aims to provide internationally comparable data on teaching and learning environments around the world, with the goal of informing education policy.
