ABS, American Bureau
of Shipping

<http://www.eagle.org>

Description of organization: From its foundation in 1862, promoting maritime safety has been the core commitment of the American Bureau of Shipping (ABS).

Today, we strive to be the most efficient provider of marine and offshore classification services. We are achieving that goal through the innovative thinking, enthusiasm and professionalism of our staff.

At ABS, setting standards of excellence in marine and offshore classification is more than a motto-it is the way we conduct business.

Type: Engineering

Job/Internship:

Rotational Program

ABS currently has openings for its full-time rotational program. This program launches twice a year in January and July. This program offers recent university graduates the opportunity to accelerate their career growth through a structured framework that combines challenging work rotations combined with technical and professional training for a period of up to 14 months. The goal of the rotational program is to develop our next generation of ABS professionals.

Affirm, Inc.

<http://www.affirm.com>

Description of organization: At Affirm we believe the financial industry is fundamentally broken. Not only is the core infrastructure built with technology from the 1970s, but there are a dwindling number of people who say "I trust my bank to look out for me". It doesn't have to be this way, and it's our mission to fix this problem. We are using technology to re-imagine and re-build core parts of financial infrastructure to enable cheaper, friendlier and more transparent financial products and services that improve lives. We are based in San Francisco; founded by Max Levchin (founding CTO PayPal), Jeff Kaditz (CDO DeNA/ngmoco), and Nathan Gettings (founding CTO of Palantir); and looking for exceptionally talented and passionate people to join us in our mission.

Type: Computer Software, Financial Services

Job/Internship:

Title: Software Engineer

Recent grads and interns in the past have built a real-time high-throughput data processing pipeline that ties our infrastructure together, built out our proprietary financial platform that is central to our long term company mission, and built out our extensive automated testing framework.

Required

- extensive experience with one of the following languages: Python, C/C++, Java
- graduating soon with a B.S. / M.S. / Ph.D. in Computer Science or related field

Bonus Experience

- continuous deployment and automated testing frameworks
- WebApp/JavaScript/AngularJS
- Mobile development
- Developer API development/documentation
- AWS or other PaS frameworks
- strong understanding of operating system internals

Degree(s): Bachelor, Masters, Doctoral

Major(s): Computer/Physical Sciences, Engineering

Position(s): Paid, Full-time, Summer Job, Internship

Arista Networks

<http://www.aristanetworks.com>

Description of organization: Arista delivers Cloud Networking solutions for large datacenter and computing environments. Arista builds and sells 10/40/100 gigabit ethernet switches with outstanding scalability, robustness, and price-performance. At the core of Arista's platform is EOS™, a pioneering open, extensible, fault-tolerant software architecture. Arista's team is built of experienced management and engineering talent from leading networking companies and universities.

Type: Computer Hardware,Computer Software

Job/Internship:

The core responsibility is to deliver product features. A major part of this is writing the code that drives our products. But the role of a software engineer is much bigger than just being a coding machine. Software engineers work on the whole development process, including:

* deciding what features to build

* driving the design

* writing the code (of course)

* pushing testing

* documenting the feature

* supporting customers in the field

Along the way, you might:

* extend and improve the test infrastructure

* hack on our engineering tools, including p4, django, python, rpm, ...

* work with sales and business development

ASML

<http://www.brion.com/>

Description of organization: ASML's Brion Technologies is a worldwide leader in computational lithography. Brion's Tachyon™ platform, a highly accurate and ultra-fast OPC and OPC verification system, provides unique capabilities that address the interrelated challenges of design, photomask making and wafer printing for semiconductor manufacturing. The move to the 32-nm node and beyond presents unique challenges for the semiconductor industry. Ultra-low k1 production techniques mean it will no longer be enough to consider IC design, mask creation, lithography and metrology in isolation. Instead, we will need a new integrated approach. The ability to optimize multiple production steps simultaneously is fundamental to ASML's Holistic Lithography vision.

CA Energy
Commission

<http://www.energy.ca.gov/careers/exams.html>

Description of organization: The California Energy Commission is the state's primary energy policy and planning agency. Created by the Legislature in 1974 and located in Sacramento, six basic responsibilities guide the Energy Commission as it sets state energy policy:

- Forecasting future energy needs;
- Promoting energy efficiency and conservation by setting the state's appliance and building efficiency standards;
- Supporting public interest energy research that advances energy science and technology through research, development and demonstration programs;
- Developing renewable energy resources and alternative renewable energy technologies for buildings, industry and transportation;
- Licensing thermal power plants 50 megawatts or larger;
- Planning for and directing state response to energy emergencies.

Type: Energy, Government, Engineering

Job/Internship:

The Energy Analyst is a recruiting and development class for persons qualified to perform analytical work on one or more aspects in a broad range of energy areas as a background. Incumbents are assigned duties and responsibilities commensurate with their background and training. An Energy Analyst studies the principles and techniques of the area of work to which assigned and, under supervision, applies them; participates in analytical studies of energy conservation, forecasting, research, siting, planning, or assessment; gathers, tabulates and analyzes data; interviews and consults with management, and others to give and secure necessary information; prepares reports/correspond and makes recommendations on procedures, and policies. Note: The Energy Analyst exam will be released October 2014

California State
Auditor

<http://www.bsa.ca.gov/bsa>

Description of organization: The California State Auditor is seeking career minded individuals with degrees in accounting, business, finance, economics, or MPA/MPP/MBA/JD graduate degrees. Candidates must have strong analytical and writing skills--and a desire to be challenged--to join our team in Sacramento. No experience is required; we will train you. Students graduating within 9 months are encouraged to apply.

We examine problems/issues/alleged mismanagement, and report our findings and recommendations to the Joint Legislative Audit Committee. We conduct financial audits, performance audits, and investigations.

To apply for auditor evaluator position, go to www.auditor.ca.gov and apply online under the "Join Our Team" link where you will create a profile to submit your resume and application.

Type: Accounting Services,Government

Job/Internship:

Auditor evaluators gather and document audit evidence; observe and document agency procedures and practices; interview personnel at all levels of agencies; obtain relevant program information and statistical data through manual or computer-assisted techniques; develop information through statistical sampling and quantitative analysis; prepare work papers to document work performed and to provide the basis for findings and recommendations; prepare written reports; draw conclusions and develop feasible and cost-effective recommendations; and present audit-related information at meetings and conferences with the California State Auditor and audited entities, the Legislature, and other interested parties.

Compass Lexecon

<http://www.compasslexecon.com>

Description of organization: Compass Lexecon is internationally recognized as a leading economic consulting firm with preeminent competition, finance, and energy practices. The firm's consultants provide law firms, Fortune 500 corporations and government clients with clear analysis of complex issues. Compass Lexecon has been involved in a broad spectrum of matters related to economics and finance – providing critical insight in legal and regulatory proceedings, strategic decisions and public policy debates. Our experience and expertise apply to virtually any question of economics, in virtually any context of the law or business.

Type: Other, Law/Law Related

Job/Internship:

Compass Lexecon is seeking Analyst candidates for our Oakland office. As part of our team-oriented approach, Analysts work closely with staff economists on a broad spectrum of matters related to economics to provide in-depth economic analysis of the relevant issues in each matter. While each project presents a different set of challenges, Analysts can generally expect to perform extensive data analyses, conduct industry research, and review case evidence. The data and research skills gained at Compass Lexecon serve as highly effective preparation for graduate studies, particularly in the fields of economics, business, law, and public policy.

Consumer Financial
Protection Bureau
Strategy Office

<http://www.consumerfinance.gov>

Description of organization: Our mission is to make markets for consumer financial products and services work for Americans — whether they are applying for a mortgage, choosing among credit cards, or using any number of other consumer financial products. Above all, this means ensuring that consumers get the information they need to make the financial decisions they believe are best for themselves and their families—that prices are clear up front, that risks are visible, and that nothing is buried in fine print. In a market that works, consumers should be able to make direct comparisons among products and no provider should be able to use unfair, deceptive, or abusive practices.

Cornerstone Research

<http://www.cornerstone.com>

Description of organization: Cornerstone Research is a consulting firm specializing in the analysis of complex financial, economic, accounting, and marketing issues. In recent years, Cornerstone Research has become one of the nation's leading finance and economics consulting firms with more than 450 full-time staff members across seven offices. We attribute our success to a unique combination of resources: a creative and energetic staff, cutting-edge research, and our network of academic and industry experts. Our consultants employ innovative problem solving approaches and achieve unparalleled analytic depth. Our uniquely collegial and supportive atmosphere makes Cornerstone Research a great place to work.

Type: Other

Job/Internship:

As an Analyst, you will play a central role at Cornerstone Research. You will work in case teams that range in size but typically include an academic or industry expert, senior consultants, and analysts. Within a case team, you will make important contributions during all phases of a project—from developing case strategy to conducting complex analyses to preparing experts for testimony. You will gain tremendous learning and development opportunities by working with faculty experts, clients, and senior consultants, and through our ongoing training programs. Please apply to our job posting via both Callisto and on our website, www.cornerstone.com/careers.

Everlaw, Inc.

<http://www.everlaw.com/>

Description of organization: We provide e-discovery tools for law firms: we help them sift through millions of documents of evidence to find the few metaphorical smoking guns that win a case in the courtroom.

We're a young startup with a real business model (we actually make money) and a bright future. We're changing the way litigation works by combining serious computer science with a cutting-edge user experience.

We host terabytes of data. We're venture funded and profitable.

Our company culture is open and democratic.

We're also big nerds. Our CEO has a Ph.D. in Computer Science from UC Berkeley. We compete with better technology and a deeper understanding of our users' needs.

Type: Computer Software, Law/Law Related

Job/Internship:

Join a small, rapidly growing startup. For this role, we will consider full-time or summer internship applicants.

You'll be developing core components of our web review infrastructure, an online platform for lawyers to search and review millions of documents.

We have plenty of big problems -- search, social tools, machine learning, data mining, user interfaces, analytics, and more -- and we'll let you decide where you want to have the biggest impact.

You don't need prior experience in any of these areas (though that's a plus), just solid coding skills, great CS fundamentals, and the willingness to learn. We think learning on the job is fun and we're happy to invest the time to conquer a new domain.

We code in Java, Javascript, and Python, and dabble in several other languages.

FireEye

<http://universityrelations.fireeye.com/>

Description of organization: FireEye has invented a purpose-built, virtual machine-based security platform that provides real-time threat protection to enterprises and governments worldwide against the next generation of cyber attacks. These highly sophisticated cyber attacks easily circumvent traditional signature-based defenses, such as next-generation firewalls, IPS, anti-virus, and gateways. The FireEye Threat Prevention Platform provides real-time, dynamic threat protection without the use of signatures to protect an organization across the primary threat vectors and across the different stages of an attack life cycle. The core of the FireEye platform is a virtual execution engine, complemented by dynamic threat intelligence, to identify and block cyber attacks in real time.

Guidebook

<http://guidebook.com>

Description of organization: At Guidebook, we don't think it should be expensive or difficult for organizations to connect with their audiences on their mobile devices.

More and more people are relying on their smartphones and tablets for information about what's going on, and how to get the most out of the experience once they get there. Forward-thinking organizations have realized this, and are trying to make the transition, but it can be a daunting task to create an app from scratch.

Guidebook makes it simple and inexpensive to go mobile. Come join us in the challenge!

Guidewire Software,
Inc.
Product Development

<http://www.guidewire.com/about-guidewire/careers/>

Description of organization: Guidewire sells three enterprise web-based software products to insurance companies that offer Property and Casualty insurance. Our products share a core technology platform that the Guidewire Platform team develops. Our customers domestically and internationally require a highly-configurable reliable technology platform. Writing that kind of software for insurance companies worldwide turns out to be surprisingly complex and difficult to get exactly right. Understanding and rising to that challenge can be rewarding. Our platform includes an MVC web presentation layer, a cluster-safe persistent data layer, advanced performance tools, an inter-application messaging architecture, and a lot more. The Platform team writes most code in Java, though we use the Gosu language too.

Type: Computer Software

Job/Internship:

Guidewire is offering an internship program for the summer of 2015. The program is designed to give active undergraduate and graduate college students an opportunity to work in a real-world business environment, writing software that people use to make a living. Our customers are insurance companies, and insurance software is surprisingly complex, difficult to get right, and actually a lot of fun to work on.

As an intern, you will learn what it means to be a professional software developer as you work on projects ranging from tools to test automation. Guidewire is an Agile development shop – we do iterative development, break features into stories, work in priority order, encourage pair programming and more.

Intentional Software

<http://www.intentsoft.com>

Description of organization: Intentional Software Corporation (ISC) is transforming the way software is developed. For over a decade, we've been creating a better programming paradigm. We're redefining how computer programs are written by minimizing the distance between a user's intention and a computer's function. Under the leadership of Charles Simonyi, you will have the opportunity to join some of the tech field's brightest minds to learn – and implement – a different approach to building software. We've created an environment where engineers thrive on pure challenge and work towards creating something truly unprecedented. Here, you will be a part of one of the world's major technology transformations. After all, isn't that why you chose computer science?

Type: Computer Software,Engineering

Job/Internship:

Software Development Engineer, Platform or Applications

Are you the person on your team always looking for the right abstractions to express the solution? Do you believe that code generation greatly increases productivity and quality? Do you wish that user interfaces had kept up with modern graphics hardware and the cool UIs in movies were available to people in real life?

Intentional Software seeks smart developers to contribute to next-generation software platform and/or applications built using that platform. ISC has been building the world's leading meta-programming technology which we are now applying to create software for customers with high-value problems that no one else can solve. Our software captures the intention of our customers and projects into many useful forms.

Jut, Inc.

<http://www.jut.io>

Description of organization: Jut is here to solve one big, crazy problem: the world of enterprise IT is so specialized and complex that just managing all the analytics "solutions" out there is a full time job. We're building a different future.

When we're done, we're going to do more than change the way people think. We're going to change the way they work. We're going to transform a collection of disparate, siloed, billion dollar markets into a unified experience so you can find answers faster, manage smarter, and spend less money doing it.

Type: Computer Software

Job/Internship:

Software Engineer — New Grad

We're looking for bright and motivated software developers in the early stages of their careers to join our growing team

You should have:

Demonstrable programming competence in a variety of languages, from Javascript to C/C++.

A solid computer science foundation, including data structures, algorithms, operating systems, and databases.

The enthusiasm and ability to hit the ground running, start contributing from Day 1, and continue to learn quickly on the job.

A good sense of the architecture of the web and HTTP / TCP networking fundamentals.

A BA/BS in computer science or a closely related field.

Degree(s): Bachelor,Masters

Major(s): Computer/Physical Sciences

Position(s): Full-time

L.E.K. Consulting

<http://www.lek.com/>

Description of organization: L.E.K. Consulting is a global management consulting firm that uses deep industry expertise and analytical rigor to help clients solve their most critical business problems. Founded more than 30 years ago, L.E.K. employs more than 1,000 professionals in 21 offices across the Americas, Europe, and Asia-Pacific. L.E.K. advises and supports global companies that are leaders in their industries – including the largest private and public sector organizations, private equity firms and emerging entrepreneurial businesses. L.E.K. helps business leaders consistently make better decisions, deliver improved business performance and create greater shareholder returns. For more information, go to www.lek.com.

Type: Other

Job/Internship:

Associate Position

The focal point of an L.E.K. project team is at the Associate level. The Associate is responsible for the comprehensive research and analysis upon which each client engagement is based.

Success of the team is dependent upon the quality and creativity of the analysis that Associates perform under the guidance of senior team members.

Application Requirements

L.E.K. does not have a rigid checklist of qualities a potential Associate must possess. Rather, our recruiting experience has shown that outstanding academic achievement, comfort with quantitative analysis, significant professional experiences, notable extracurricular interests, and demonstrated leadership and initiative are excellent preparation for a position within the Associate Program at L.E.K. Consulting.

**Meraki
Engineering**

<http://meraki.cisco.com>

Description of organization: Meraki is a networking systems company located in the heart of San Francisco. Our unique cloud-hosted controller architecture provides centralized management and security through an intuitive web interface, eliminating high costs and complexity associated with traditional networking systems.

We're a fun company to work for, so long as you don't mind free food + beer, flexible hours, wall space occupied by Chewbacca and unicorns, Nyan Cat greeting on the Intranet, and most importantly: a small dev team.

We're hiring for full time and internship positions on our teams working on user interface, distributed back-end systems, and device drivers.

Type: Engineering

Job/Internship:

We are currently hiring full-time & internship roles for teams working on distributed back-end systems, device drivers, and our web application. Cisco Meraki is comprised of small teams (ranging from 2 - 5 people) that work on Front-end, Back-end, Mobile and Firmware; however, our engineers hack the full stack. As a software engineer at Cisco Meraki, you get to have an impact along with the opportunities to move between teams and learn new things constantly. We like one or more of: Strong Javascript, CSS, Ruby on Rails skills, Fluency in C (device driver experience is helpful), Familiarity with C++ and understanding of databases. We also like: building production systems, embedded systems/networking, systems performance optimization, and running a live web service.

Metric Theory, LLC.
Online Marketing

<http://metrictheory.com/>

Description of organization: Metric Theory provides Search Engine Marketing and display advertising services for our clients. We are able to achieve market-leading results by focusing on:
Data – We have unprecedented access to data on who’s visiting a site, what actions they are taking, and how they got there.
Technology – We provide a technology-enhanced service to gain additional insights into campaigns, increase efficiency, and provide more transparent and robust reporting.
Communication – A dedicated account manager creates clear communication and ensures that we are aligned with our clients’ goals.
Results – Whether the goal is to increase ROI, drive additional conversions, improve traffic quality, or to raise awareness about a new product, our prime focus is to deliver top results.

Type: Other

Job/Internship:

The PPC Analyst position is the initial phase in a career track that builds mastery in both paid search advertising as well as account services. This role is designed to provide you with the training required to drive demonstrable results on advertising campaigns ranging from \$10,000-\$500,000/month in budget. The role is expected to last from 4 to 8 months ending with a promotion into an Account Manager position. Analysts go through an extensive proven internal classroom and hands on training program led by the Metric Theory management team, which has a track record of developing over thirty PPC Account Managers in the past three years.

Parthenon Group, The

<http://www.parthenon.com>

Description of organization: The Parthenon Group is a leading advisory firm focused on strategy consulting with offices in Boston, London, Mumbai, Shanghai, Singapore, and San Francisco. Since its inception in 1991, the firm has embraced a unique approach to strategic advisory services: long-term client relationships, a willingness to share risk with our clients, an entrepreneurial spirit, and customized insights. This unique approach has established the firm as the strategic advisor of choice for CEOs and business leaders of Global 1000 corporations, high-potential growth companies, private equity firms, educational institutions, and healthcare organizations. To learn more about Parthenon and the Associate role, please visit our website at www.parthenon.com.

Type: Other

Job/Internship:

Associates participate as members of project teams in all aspects of the business. As team members, they receive significant responsibility for assembling data, performing analysis, structuring arguments, and developing presentations. Ongoing training is given for key business concepts and analytical methods as part of the Associate program. Due to the smaller size of our firm and the nature of our work, Associates typically gain responsibility more quickly than at other consulting firms.

SunPower Corporation
Talent Acquisition

<http://us.sunpowercorp.com>

Description of organization: Do you want to change the world? We do, too.

The energy market is roughly \$4 trillion globally, and solar penetration is less than 1%. But just one hour of sunlight, if harnessed, could power the entire world for a year. We have the opportunity to completely change the way energy is produced, distributed and consumed on a global scale, and we're looking for talented, committed people to help us drive our growth and achieve our goals.

SunPower is a global solar energy solutions company with a rich heritage of pioneering the best energy technologies in the world. Our solutions are unrivaled in terms of long-term reliability, efficiency and guaranteed performance, and our company is unmatched in terms of global reach and scale. Through design, manufacturing, installation and ongoing

Tableau Software

<http://www.tableausoftware.com>

Description of organization: Tableau Software is one of the fastest-growing technology companies in the world, with more than 80% year-over-year sales growth reported in 2013. Our mission is simple: we help people see and understand their data. After a highly successful IPO in 2013, Tableau has become a market-defining company in the business intelligence industry. But don't take our word for it—read what analysts like BARC and Gartner have to say about us. Tableau's culture is casual and high-energy. We are passionate about our product and our mission and we are loyal to each other and our company. We value work/life balance, efficiency, simplicity, freakishly friendly customer service, and making a difference in the world. Tableau offers exceptional professional and financial growth potential.

Walgreens

<http://walgreens.jobs>

Description of organization: At Walgreens, we help people get, stay and live well. That's our core purpose and the difference we make in people's lives every day. Our purpose has shaped the direction of our company since Charles R. Walgreen Sr. founded his first drugstore in 1901, and it still does today.

Our team members make that purpose come to life in our over 7,800 stores in all 50 states, the District of Columbia and Puerto Rico, in our call centers, distribution centers, on-site clinics, specialty pharmacies and corporate offices. In fact, those daily demonstrations of our purpose have helped Walgreens become an industry leader and a household name.

Xamarin

<http://www.xamarin.com>

Description of organization: Xamarin is on a mission to make it fast, easy and fun to deliver great mobile apps. Founded in May 2011, Xamarin is a very fast-growing VC funded mobile startup with offices in San Francisco, Boston, Århus and Buenos Aires. Over 600,000 developers and over 30,000 customers use Xamarin because we provide the best platform to create and test fully native mobile apps for iOS, Android, Mac and Windows.

Xamarin is redefining cross-platform mobile development by unifying fully native app development for iOS, Android, Mac and Windows in a single C#-based platform. Developers get full access to each platform's APIs — anything that can be done in Objective-C and Java can be done with Xamarin — and share on average up to 75% source code across platforms.

Type: Computer Software
