By using the teaching strategies in this section and other strategies in the resource which teach skills and strategies explicitly, teachers can provide students with effective instructional support to develop their skills and achieve syllabus outcomes. Instruction for students with difficulties in learning requires teachers to: explicitly teach skills and strategies rather than relying on incidental learning. teach small amounts of material and emphasise key points to address problems with attention. Effective Vocabulary Instruction: What the research says. In its analysis of the research on vocabulary instruction, the National Reading Panel (2000) found that there is no one best method for vocabulary instruction, and that vocabulary should be taught both directly and indirectly. This kind of direct vocabulary instruction is particularly important for students with learning disabilities (Juell & Deffes, 2004). Direct instruction of specific words can include teaching the multiple meanings of some words, different word associations (such as antonyms and synonyms), and word concepts (such as related concept words and categories of words). Struggling readers and students with learning disabilities in particular have difficulty using a dictionary.
