Information-systems Development: Systems Thinking In The Field Of Information-systems

Paul J Lewis

Development: Information systems have undergone great deal of evolution, i.e. from manual record keeping to the current cloud storage system. Similarly, information technology is seeing constant changes with evermore faster processor and constantly shrinking size of storage devices. Business Application: Businesses have been using information systems for example in form of manual books of accounts to modern TALLY. Future of Information System and Information Technology. Information technology has shown exponential growth in the last decade, leading to more sophisticated information systems. Today’s information technology has tremendously improved quality of life.
