   Audrey Laing and Jo Royle

9 Diversity, or is it all the same? Book consumption on the Internet in Sweden 135
   Ann Steiner

10 New voices in the new millennium 147
   David H. Lynn
The Future of Work and Education in the Digital Age. In the Spotlight. Think Tanks. The digital revolution opens new windows of opportunity for the G20 to spur their goal of gender equality. The digital revolution, characterized by artificial intelligence, big data, cloud computing and mobile robotics could improve female participation in economic life and enhance the economic and social autonomy of women in (at least) three ways. In addition, high proficiency in digital skills will become a core requirement in the digital age. Since many women possess stronger social skills than their male peers they could benefit from exploiting these complementarities.
