In this chapter, the way the cells of the body are organised into different tissues is described. You will find out how these tissues are arranged into organs, and how the organs form systems such as the digestive system and the reproductive system. Also in this chapter, the important concept of homeostasis is defined. You are also introduced to those pesky things—directional terms. After completing this section, you should know: the Mrs Gren characteristics of living organisms. The vertebrate body by Alfred Sherwood Romer; 15 editions; First published in 1949; Subjects: Vertebrates, Anatomy, Comparative Anatomy, Anatomy and histology, Accessible book, Protected DAISY, Antropologia Biologica, Vertbrs, Anatomia Comparada E Animal, Gewervelde dieren, Anatomie, Anatomy & histology, Anatomia, In library.
