Diagrams That Changed the World (UK; publiclibrary) by investigative journalist and documentarian Scott Christianson chronicles the history of our evolving understanding of the world through humanity's most groundbreaking sketches, illustrations, and drawings, ranging from cave paintings to The Rosetta Stone to Moses Harris's color wheel to Tim Berners-Lee's flowchart for a mesh information management system, the original blueprint for the world wide web. But most noteworthy of all is the way in which these diagrams bespeak an essential part of culture — the awareness that everything builds on what came before. From primitive cave paintings to the complicated DNA double helix drawn by Crick and Watson, they chart dramatic breakthroughs in our understanding of the world and its history. This fascinating book encompasses everything from the triple spirals found on prehistoric megalithic tombs dating right up to the drawings sent out on the side of space exploration probes. Discover Leonardo da Vinci's beautiful technical drawings, pre-empting the invention of manned flight, Copernicus's bold diagrams that dared to tell us that Earth was not at the centre of the Universe, as well as the historian...
