The Glover Report on Reproductive Technologies to the European Commission

The global assisted reproductive technology market size was estimated to be around USD 21 billion in 2017 and is anticipated to grow at a CAGR of 10% over the forecast period. Contributing factors to the growth are the increasing number of infertility cases due to obesity, growing stress and pollution, increasing number of smokers, fertility threatening treatments such as chemotherapy and favorable regulatory framework. Assisted Reproductive Technology (ART) Market Size, Share & Trends Analysis Report By Type (IVF, AI-IUI, FER, Others), By End Use (Hospitals, Fertility Clinics), By Procedures And Segment Forecasts, 2018 - 2025. Published Date: May, 2018. Base Year for Estimate: 2017. The future of reproductive technology has many excited about its potential to allow biological birth for those who might not otherwise have been capable of it. Experiments going on today, such as testing functional 3D-printed ovaries and incubating animal fetuses in artificial wombs, seem to suggest that future is well on its way, that fertility medicine has already entered the realm of what was once science fiction. Yet, who will have access to these advances? Americans looking to procreate increasingly rely on reproductive technology to do so. About 12 percent of Americans between the ages of 15 and 44 have difficulty getting pregnant or carrying a pregnancy to full term, according to the Centers for Disease Control and Prevention (CDC). The series is named after the Human Fertility Database as the central resource of detailed and high quality data on period as well as cohort fertility. The full list of HFD Research Reports can be accessed at <http://www.humanfertility.org/cgi-bin/reports.php>. Abstract. Delayed parenthood is a central feature of the massive transformation of family and reproduction in rich countries. We analyse the shift of motherhood towards later reproductive ages during the last four decades and review its consequences for children and their mothers in low-fertility countries in Europe, North America, Oceania
