Computers and Human Language

GEORGE W. SMITH

University of Massachusetts, Boston

Offering an inquiry into the nature of language from the perspective of computing, *Computers and Human Language* synthesizes recent research in linguistics, computer science, and experimental psychology as it explores the major computational approaches to language.

Among the topics considered are the computationally tractable, symbolic basis of language, the mental lexicon as repository of knowledge, the elegantly recursive structure of syntax, and the compositional nature of meanings, together with the segmentation, focus, and hierarchical construction of extended discourse. This text also explores such up-to-the-minute subjects as neurally-inspired computing, parsing and psychological plausibility, the controversial representation hypothesis, and the ramifications of discourse "focus." With its clear, engaging style and gradual, systematic exposition, *Computers and Human Language* makes the fast-moving world of computational linguistics accessible to the beginning student.

Current Research in Natural Language Generation

edited by

Robert Dale, Chris Mellish, and Michael Zock

A Volume in the COGNITIVE SCIENCE Series

Natural language generation research has been boosted in the past decade by an increased engagement in the problems of constructing coherent and purposeful texts with computers. In the course of this research many linguistic formalisms have been adopted. This book provides a snapshot of the state of the art in natural language. It gathers the leading U.S. and European NLG researchers and sets them in the context of five themes—text planning, linguistic realism, building realization, building descriptions, and connectionist approaches.

CONTENTS: *E.H. Hovy*, Unresolved Issues in Paragraph Planning. *A. Cawsey*, Generating Explanatory Discourse. *D.R. Scott and C. Sieckenius de Souza*, Getting the Message across in RST-Based Text Generation. *K. McKeown, M. Elhadad, Y. Fukumoto, J. Lim, C. Lombardi, J. Robin, and F. Smadja*, Natural Language Generation in COMET. *G. van Noord*, An Overview of Head Driven Bottom-Up Generation. *K.J.M.J. De Smedt*, IPF: An Incremental Parallel Formulator. *H. Horacek*, The Architecture of a Generation Component in a Complete Natural Language Dialogue System. *R. Dale*, Generating Recipes: An Overview of Epicure. *E. Reiter*, Generating Descriptions That Exploit a User's Domain Knowledge. *G. Houghton*, The Problem of Serial Order: A Neural Network Model of Sequence Learning and Recall. *H. Kitano*, Parallel Incremental Sentence Production for a Model of Simultaneous Interpretation. Index.

THE ACL-MIT PRESS SERIES in NATURAL LANGUAGE PROCESSING

*Aravind Joshi, Karen Sparck Jones, Mark Y. Liberman,
Editors*

The ACL Series will offer books of high quality in the field of natural language processing, including human and machine speech production and understanding. It will cover a wide range of topics, both theoretical and applied, which should interest researchers not only in computational linguistics, but also in formal linguistics.

The Series will include specially commissioned volumes, research monographs, textbooks, and on occasion, collections of high quality papers with clear unifying themes compiled under the editorship of distinguished researchers.

The MIT Press publishes the ACL journal, *Computational Linguistics*. The Press also has a strong list in formal linguistics and publishes the journal *Linguistic Inquiry*.

Submissions for the ACL Series should be directed to one of the Editors, or to Henry Bradford Stanton at The MIT Press

New! COGNITIVE MODELS OF SPEECH PROCESSING

Psycholinguistic & Computational Perspectives
edited by Gerry T.M. Altmann

Cognitive Models of Speech Processing presents extensive reviews of current thinking on psycholinguistic and computational topics in speech recognition and natural language processing, along with a substantial body of new experimental data and computational simulations.

Contributors: Gerry Altmann. Richard Shillcock. Uli Frauenfelder, Guus Peeters. Dennis Norris. Anne Cutler. Paul Luce, David Pisoni, Steven Goldinger. William Marslen-Wilson. Jan Charles-Luce, Paul Luce, Michael Cluff. Ellen Gurman Bard. Jacques Mehler, Emmanuel Dupoux, Juan Sequi. Cynthia Connine. Arthur Samuel. Lorraine Komisarjevsky Tyler. Henry Thompson, Jeffrey Elman. Michael Tanenhaus, Susan Garnsey, Julie Boland. Lyn Frazier. Janet Fodor. Mark Steedman. Mitchell Marcus. Aravind Joshi.

A Bradford Book \$55.00

**PLAN RECOGNITION IN
NATURAL LANGUAGE
DIALOGUE**

Sandra Carberry

In most current natural language systems each query is treated as an isolated request for information regardless of its context in dialogue. Sandra Carberry addresses the problem of creating computational strategies that can improve user-computer communication by assimilating ongoing dialogue and reasoning on the acquired knowledge.

A Bradford Book \$35.00

**INTENTIONS IN
COMMUNICATION**

edited by Philip R. Cohen, Jerry Morgan, and Martha E. Pollack

The fourteen contributions in this book address central questions about the nature of intention as it is understood in theories of communication, the crucial role of intention recognition in understanding utterances, and the use of principles of rational interaction in interpreting speech acts.

A Bradford Book \$45.00

SPEAKING

From Intention to Articulation

Willem J.M. Levelt

Willem "Pim" Levelt, Director of the Max Planck Institute for Psycholinguistics, covers the entire process of speech production, from message formulation to articulation to self-evaluation of speech.

ACL 1991 DUES STATEMENT

Provide Complete Information To Insure Accurate ACL MEMBERSHIP DIRECTORY Entry

Membership in the *Association for Computational Linguistics* is for the calendar year, regardless of when dues are paid. Membership includes a full year of the *ACL* journal **Computational Linguistics**, reduced registration at most *ACL*-sponsored conferences, and discounts on *ACL*-sponsored publications. **A late payment fee will be charged for renewals made after 1 March**; this fee does not apply to new members. Institutions now *subscribe* to the journal through MIT Press Journals, 55 Hayward Street, Cambridge, MA 02142 USA; (+1-617)253-2889. Back issues and proceedings are available only from the *ACL* Office, except that institutions should backorder journals from 1988 on through MIT Press. An order form is on the other side of this statement. Payments for dues, back issues, and proceedings can be made in Europe and Japan as well as the U.S.; **most Europeans should pay through Europe**; read the directions under the heading **PAYMENT** below carefully. *Identify your institutional affiliation if it is not part of your address.* Also provide your telephone country & city codes and your computer network & email address. **Write legibly, please!**

INTERNATIONAL FUND \$ _____

PAYMENT: Prepayment is necessary; invoices are available on request. The U.S. dollar price is definitive when paying in other currencies. Checks and money orders should be made out to the *Association for Computational Linguistics* (or to *ACL*). Payments can be made to one of the addresses below, as follows:

1. To Walker in the USA; mail this dues statement with a check or money order *payable to ACL*. Bank drafts cannot be accepted. **PAYMENTS MUST BE MADE IN U.S. DOLLARS, DRAWN ON A U.S. BANK OR IN U.S. OR CANADIAN DOLLARS (CONVERTED AT THE CURRENT EXCHANGE RATE), DRAWN ON A CANADIAN BANK.**
2. To Rosner in Europe; mail this dues statement with a check or money order in Swiss francs or the equivalent in your local currency on the day the check is written, *payable to ACL*. Ensure that the check is payable in Switzerland or France. **Do not issue a check or money order in U.S. dollars unless it is drawn on a U.S. Bank.** Payment can also be made by bank transfer to *ACL* account number 141.880.LAV at the Union Bank of Switzerland, 8 rue de Rhone, CH-1211 Geneva 11, SWITZERLAND. Send Rosner a copy of the bank transfer as well as the dues statement. **EUROPEAN MEMBERS SHOULD PAY THROUGH ROSNER UNLESS THEY HAVE A U.S. OR CANADIAN BANK ACCOUNT.**
3. To Nagao in Japan; transfer an equivalent amount in yen on the day of payment to "Dai-ichi Kangyo Bank, Hyakumanben Branch; Ordinary Deposit, 476-1319944; Name: Keisangengokakai Kaihi Nagao Makoto." Mail this dues statement to Walker together with a copy of the bank transfer. Also send Nagao a copy of the bank transfer. Note: **THE DUES STATEMENT MUST BE SENT TO WALKER TO BE PROPERLY RECORDED IN THE ACL OFFICE.**

Guidelines for Submissions

Manuscripts for **Computational Linguistics** should be submitted on letter-size paper (8.5 by 11 inches, or A4), double-spaced throughout, including footnotes and references. The paper should begin with an informative abstract of approximately 150–250 words. Manuscripts must be written in English. Contact the editor regarding the possibility of electronic submission.

Submissions may be made in any of the following categories:

Paper: This category includes contributions that report significant new research results in computational linguistics or that provide critical reviews of the literature on a particular topic. The length of a paper depends on its content, but we suggest that manuscripts be limited to forty double-spaced pages. That is the equivalent of thirty journal pages. Each paper is fully refereed, being read by at least two members of the editorial board and usually by an additional expert in the particular subject area. The submission of an article to CL for refereeing means that the author certifies the manuscript is not copyrighted; nor has it been published or submitted for publication to another refereed journal. If any version of the paper has appeared, or will appear, in a non-refereed publication, the details of such publication must be made known to the Editor at the time of submission. The final version of a paper tentatively accepted for publication must be accompanied by a Copyright Transfer Agreement signed by all of the authors or, in the case of a "work for hire," by the employer. This written transfer is necessary under the 1978 U.S. Copyright law.

Technical Correspondence: This category includes short articles reporting preliminary results of some project in progress, or the results of other studies of interest to the readership. Technical correspondence should not generally exceed eight double-spaced pages. Each technical correspondence is reviewed by at least two members of the editorial board before acceptance.

Letters to the Editor: This includes statements of opinion on issues relevant to the readership. The Editor and the editorial board will evaluate the appropriateness of these contributions for inclusion.

Five copies of papers, technical correspondences, and letters should be sent to the Editor:

James F. Allen, CL Editor
Department of Computer Science
University of Rochester
Rochester, NY 14627, USA
(+1 716) 275-5288; acl@cs.rochester.edu

Anyone interested in reviewing a book, or in suggesting a book for review, should contact the Book Review Editor; publishers may also submit copies of books for review directly to the Book Review Editor:

Graeme Hirst, CL Book Review Editor
Department of Computer Science
University of Toronto
Toronto, CANADA M5S 1A4
(+1 416) 978-8747; gh@cs.toronto.edu

The FINITE STRING Editor should receive (a) copies of technical reports and reprints of papers published elsewhere — or at least citation information and abstracts of such items and of books and monographs; (b) summaries of research in progress — of particular interest would be perspectives on the activities at a particular institution; (c) announcements of meetings of potential interest to the membership; and (d) personal notes (e.g., honors, moving, changes in status). Time-sensitive material should be received by the first day of the second month of each quarter to appear in the next issue. Submissions (where possible in electronic form) should be sent to The FINITE STRING Editor:

Ralph Weischedel, FINITE STRING Editor
BBN Systems & Technologies Corporation
10 Moulton Street
Cambridge, MA 02238, USA
(+1 617) 491-1850; weischedel@bbn.com

Founded in 1962, the Association for Computational Linguistics (ACL) is the primary scientific and professional society for natural language processing research and applications. A European chapter was established in 1982. Besides publishing *Computational Linguistics*, the ACL holds international meetings (annually in North America, biennially in Europe) where the state-of-the-art in natural language processing research and development is presented. It also sponsors a series of books on natural language processing through The MIT Press. Recently, special interest groups on the Mathematics of Language, the Lexicon, Parsing, and Generation have been formed; others are likely to be added.

Computers cannot understand human languages, unless there is software to translate it to something the CPU can understand. Basically, they cannot understand human languages, only languages specifically designed for computers. Either way, the computer cannot understand human languages. The software takes the input, translates it, and sends it to the desired location. Some programming languages are based on English; such as BASIC, which uses commands like GOTO, PRINT, INPUT. The point is: Computers cannot understand human languages. onekopaka 1 decade ago. 0.
