There is more to Alaska than numbers, however. Its history is part of the history of North and South America. Archaeological sites show that it was part of the earliest bridge between Asia and the Americas. Although it has a modern infrastructure, the landscape and weather still determine, to a large extent, how people there travel. Alaska officially entered United States history when it was purchased from Russia in 1867 for \$7.2 million. Most Americans were opposed to the purchase at the time. A railroad linking the coastal towns of Seward and Anchorage with inland Fairbanks was completed in 1923. In early 1942, the United States and Canada agreed to build a highway through western Canada to connect Alaska to the 48 states.
