Cross cultural communication thus refers to the communication between people who have differences in any one of the following: styles of working, age, nationality, ethnicity, race, gender, sexual orientation, etc. Cross cultural communication can also refer to the attempts that are made to exchange, negotiate and mediate cultural differences by means of language, gestures and body language. It is how people belonging to different cultures communicate with each other. Each individual can practice culture at varying levels. There is the culture of the community he grows up in, there is work cult Effective internal communications in a culturally diverse organization means being able to share and exchange ideas based on mutual awareness, respect and credibility. Implementing diversity training to improve communication in the workplace is mutually beneficial for employees and the organization, ensuring a high level of productivity and return on investment. With the increased globalization in everything we do, it is essential to establish and maintain effective cross-cultural communication. Workplace diversity can clearly create more opportunities than challenges. That said, we should pla Critical theory is the reflective assessment and critique of society and culture by applying knowledge from the social sciences and the humanities. As a term, critical theory has two meanings with different origins and histories: the first originated in sociology and the second originated in literary criticism, whereby it is used and applied as an umbrella term that can describe a theory founded upon critique; thus, the theorist Max Horkheimer described a theory as critical insofar as it seeks "to
