The Drift to War is thus a riveting account of British policy during the period, from the creation of the League of Nations to Hitler's annexation of Austria and occupation of Czechoslovakia. A must-read for historians and all those with an interest in this period of modern history. Praise for Richard Lamb. "Full of revealing and important information." - John Terraine, Daily Telegraph. "A notable contribution" - judicious, detailed and scrupulously fair, as might be expected from one of Britain's most respected military writers." - Drew Middleton, New York Times. Continental drift is the theory that the Earth's continents have moved over geologic time relative to each other, thus appearing to have "drifted" across the ocean bed. The speculation that continents might have 'drifted' was first put forward by Abraham Ortelius in 1596. The concept was independently and more fully developed by Alfred Wegener in 1912, but his theory was rejected by many for lack of any motive mechanism. Arthur Holmes later proposed mantle convection for that mechanism. The idea of This work sets out to show how the rise of Nazism and World War II could have been avoided. From the end of World War I when British and French hubris made a strong League of Nations an impossibility, to Chamberlain's secret negotiations with Hitler, Allied foreign policy set the stage for war.
