One solution is the after-school art program, similar to the ones the are creative solutions where schools can incorporate the arts into their
ART 302 Art in the Elementary Classroom (5) Using selected studio experiences in drawing, painting, and three-dimensional art forms, and by reading about and viewing works of art, students examine early human development in the visual arts, with an emphasis on exercises appropriate to the elementary classroom. Through these experiences in art, the problem is perceived as a visual problem and not related to a mathematical equation or a scientific formula that requires one correct answer. Motivation for artmaking exercises comes from finding or having a problem to solve, however, these problems may vary in their potential for creative processing (Koster 2001).

The complex natures of the visual arts appear to provide an excellent platform to actively engage students in critical and creative thinking—both higher-order cognitive skills. This article presents information about a series of four qualitative ethnographic case studies that were conducted in primary and secondary schools in northern New South Wales, Australia. Start by marking “Bringing Art Into the Elementary Classroom” as Want to Read: Want to Read saving… Want to Read. This text shows prospective teachers practical ways to create classroom environments in which children become artists as they also become readers and writers. Based on the mind-expanding work of Howard Gardner and other teacher-researchers on the relationship between art and literacy, this book emphasizes the integration of all the arts into the elementary curriculum. It shows prospective teachers practical ways to create classroom environments in which children become artists as they also become readers and writers.
