

Workers, state and development in Brazil

Powers of labour, chains of value

Ben Selwyn

Students and academics working in the fields of Development Studies and Politics.

Within the field of development studies, the importance of class relations is usually relegated to lesser status than the roles of states and markets in generating and allocating resources. This book argues that processes of class formation, struggle, and crucially, the changing balance of class forces between capital and labour constitute a key determinant of different patterns of capitalist development.

Workers, state and development in Brazil illuminates these key issues in political economy through a detailed empirical investigation of the nexus between class dynamics and developmental processes and outcomes in North East Brazil's São Francisco valley. It details how workers in the valley's export grape sector have utilized their structural and associational power to win concessions from employers, contributing to a progressive pattern of regional capitalist development.

Based on a stimulating engagement with and critique of World Systems Theory and the Global Commodity Chains approach, this book will be of wide-ranging interest to those interested in understanding how global dynamics impact on local development. It will appeal to students and researchers interested in processes of capitalist development, class formation and

Contents

Labour law: Labor law, the varied body of law applied to such matters as employment, remuneration, conditions of work, trade unions, and industrial relations. Labor law also deals with the legal relationships between organized economic interests and the state and the rights and obligations related to some social services. In the early phases of development the scope of labour law is often limited to the most developed and important industries, to undertakings above a certain size, and to wage earners; as a general rule, these limitations are gradually eliminated and the scope of the law extended to include handicrafts, rural industries and agriculture, small undertakings, office workers, and, in some countries, public.
