Meet the Future 50, our new ranking of companies best positioned for growth. Among the inaugural list: Salesforce, Tesla, Netflix, and more. To identify the Future 50, BCG examined 1,100 publicly traded companies with at least \$20 billion in market value or \$10 billion in revenue in the 12 months through the end of 2017. A company's final score represents its outperformance across the following metrics when compared with peers of a similar size. 50% of a company's score is based on market potential—defined as its expected future growth as determined by financial markets. This is assessed by calculating the present value of its growth opportunities, which represents the proportion of its market value that is not attributable to the Space in the Future essays. From the beginning of time humans have tried to explore and to conquer new assets. The future looks promising to this human characteristic. Humans have lived on this planet for a long time and they are destined to move onto another planet or into another galaxy. We have exp. I think that tax dollars as well as government money should go to the space program. I feel this way because the more we learn about space in general, the more technological advancements we will acquire in the years to come. If you think about everyt
