Urban design: method and techniques. This book, therefore, aims to explore the method and techniques which will deliver both sustainable development and city environment of great quality. At the turn of the century, at the start of a new millennium, quality in urban design must be seen against a backdrop of current concerns for the global environment and in a context of sustainable development where the environment is of paramount importance and is given priority in design decisions. Urban design, or the art of building cities, is the method by which man creates a built environment that fulfils his aspirations and represents his values. One value which is becoming increasingly important is care for the natural and built environment for the benefit of future generations. Results from Google Books. It also influences the design of reading materials, since tasks that seek to teach or assess literal comprehension may be different from those that are used to teach or assess appreciation. In class I give the participants authentic texts from different genres and ask them a) to first identify an appropriate level of comprehension in reading the text; and b) to develop reading activities that involve the relevant level of comprehension. The materials developer will also need to consider the complementary question of the theory of language learning underlying the materials, since this will determine how the syllabus is implemented in the form of exercises, tasks, activities and learning experiences. Particular language models are often linked to particular views of learning.
