Role of financial system in economic development of a country. The following are the roles of financial system in the economic development of a country. Savings-investment relationship. To attain economic development, a country needs more investment and production. Private sector will find it difficult to raise the huge capital needed for setting up infrastructure industries. For a long time, infrastructure industries were started only by the government in India. But now, with the policy of economic liberalization, more private sector industries have come forward to start infrastructure industry. The Development Banks and the Merchant banks help in raising capital for these industries. Financial system helps in development of Trade. Financial sector development in developing countries and emerging markets is part of the private sector development strategy to stimulate economic growth and reduce poverty. The Financial sector is the set of institutions, instruments, and markets. It also includes the legal and regulatory framework that permit transactions to be made through the extension of credit. Fundamentally, financial sector development concerns overcoming "costs" incurred in the financial system. This process of reducing costs
