Home Economics World Economy and International Economic Relations. < Prev. For international trade regulations also applied the other trade restriction, -non-tariff ones, which is widely used in the trade practices. Distribution of non-tariff barriers stems from the fact that their introduction is the privilege of the state government, and they are not regulated by international agreements. The use of public procurement policy, to some extent, discriminates against foreign suppliers. The purpose of financing, as a method of the international trade regulation, in particular, the exports expanding, is discrimination of foreign companies for domestic producers and exporters by reducing the value of the exported goods and enhancing their competitiveness in the world market.
