Contact: Charlie Rapple

Email: charlie.rapple@publishingtechnology.com

Website: www.publishingtechnology.com

Publishing Technology incorporates Ingenta, PCG and VISTA, and enables publishers to focus on their core competences by outsourcing technology requirements to a single, trusted partner. It uniquely fuses online and offline publishing technologies to provide the industry's only end-to-end suite of software specifically designed to support the publishing process, from editorial, website development, fulfilment and customer service to rights & royalties management, information commerce and business intelligence. Its sales and marketing consultancy has helped hundreds of publishers to strategically grow their business. Flagship web platform IngentaConnect provides more than 25,000 libraries and millions of end users with document delivery and current awareness for over 30,000 publications.

Repositories Support Project (RSP)

Stand: 14

Contact: Bill Hubbard

Email: Bill.Hubbard@nottingham.ac.uk

Website: <http://www.rsp.ac.uk/>

The Repository Support Project (RSP) is helping to develop open access repositories in UK Higher Education. The RSP is building repository capacity, knowledge and skills within institutions, through guidance, information, sharing best practice, technical "surgeries", site-visits and an active outreach programme.

RSP advises on the best way to develop repositories from a background of practical experience, through practitioner-based presentations, briefing papers and hands-on support.

Staff consult with the community at large to ensure institutions can be effectively supported whatever their repository type or stage of maturity. A databank of expertise, know-how and best practice is being built at the project website - www.rsp.ac.uk and staff can be approached directly through the stand at UKSG.

Ringgold Ltd

Stand: 8

Contact: Helen Henderson

Email: helen@ringgold.com

Website: www.ringgold.com

Ringgold provides services to publishers to standardize, organize and exploit their customer data. Ringgold's Identify database contains metadata for 100,000

institutions that use academic journals covering all sectors and most countries. The database is available under license for market analysis including market penetration and gap analysis to compare the clients customers with the main markets.

OpenIdentify is Ringgold's web-based registry of identifiers, used by libraries and the publishing industry to improve journal supply chain efficiencies. This web service can also be used by smaller publishers for hosting their subscriptions to carry out market analysis in conjunction marketing and sales consultants.
