Research on infants and children in the HDFS department addresses multiple issues. Those include studies about children's health, e.g., obesity and sleep problems, early childhood developmental trajectories of children at risk for autism, parenting and parent-child relationships, peer relationships, and how individual, family and home factors can protect children against adverse developmental outcomes and promote social competence and well-being. Dr. Duncan studies the ways that environments in infancy, early childhood, and middle childhood can affect children's cognitive and social-emotional development. He is particularly interested in the impacts of early environments and skill development for later developmental outcomes. James Elicker. As children struggle with these essential tasks, parents must be able to provide praise and encouragement, but they must also allow their kids sometimes to experience the natural consequences for their behavior or provide logical consequences to help them learn from mistakes. Parenting Teenagers "Adolescent Development & Parenting Tips (13 - 18 Years Old). Learn More about How To Parent Your Teenager. There is no doubt that for most families, the teen years present a challenge for both parents and children. Middle School is not fondly remembered by most who attend. It is often fraught with
