Topics center on origin of life issues. Includes videotaped lectures by Riddle, Student Manual, Instructor Guide, and a CD with everything in the course except video. Includes PowerPoint slides, if you wish to lecture. If your class is large, you should provide small group leaders to role-play with students, to help students learn to ask good questions in biology classrooms, to spread their knowledge (gently!) to their classmates. 2001 11 hrs.

**Origin of Mankind ~The HS-COL #6090**
John C. Whitcomb. From a Scriptural standpoint, contrasts the origin of Man with the claims of evolution. One major point is how Adam could have named the animals in one day (he had more intelligence and memory than we). Emphasizes the differences between humans and animals. 50 min.

Chuck Smith, Caryl Matrisciana. “…study of the world’s major religions … compare Christianity with other religious philosophies by contrasting their religious writings, examining archaeological and historical evidence, and examining claims of prominent religious leaders.” Very well-done. 1991 48 min.

Remarkable Record of Job –The HS-COL #1069
Henry Morris Jr.. “…the account of Job… is one of the most historically and scientifically accurate records of the ancient world. Perhaps the oldest book in the Bible, the Book of Job touches on many subjects of science and history…. This commentary … attests to the historicity of a man…who understood at the end of his life that God cannot be “figured out,” but He can most certainly be trusted.” 2000 146 pg.

Roaring Waters GR 6-COL #6189
Narrated. “As your family watches powerful storms, flooding rivers, and crashing tidal waves, you will marvel together at the power of God’s creation. . . You’ll learn why tides ebb and flow like clockwork, the source of thunderstorms, and why, if you live on a flood plain, you should never let your guard down!” 1995 43 min.

Rock Strata, Fossils, and the Flood GR 6-COL #5181
Andrew Snelling. If the global Flood cataclysm really occurred as described in Genesis 7–8, then what evidence would we look for? Wouldn’t we expect to find billions of dead plants and animals deposited rapidly by water in rock layers all over the earth? In this illustrated lecture, Dr. Andrew Snelling demonstrates that is exactly what we find. 2007 47 min.

Ken Ham. "Ken Ham gets to the heart of the debate about the six days of creation. If we ‘read from’ what the biblical text says (exegesis), it allows only one interpretation–six 24-hour days. Any other interpretation is eisegesis (‘reading into’ the Bible)." 2003 75 min.

Jerry Bergman, Donn Chapman. 2 shows on one CD. “Slaughter of the Dissidents” is based on his book of that title, documenting many cases of academics who were fired strictly because they doubted macro evolution! Solution: we need laws to protect academics from discrimination based on their ideas! “Persuaded by the Evidence” is another of Bergman’s books, this time detailing how several atheistic/agnostic scientists came to faith in a Creator based on scientific evidence itself, refuting the charge that “No REAL scientists doubt Darwin!” 30 min. each

Henry Morris Jr., John Morris. Traces evolutionism’s origins back long before Darwin, and demonstrated that acceptance of evolution as a “fact” has altered how we “do science,” and caused a “Civil War of Values” in Western culture. What Are They Teaching Our Children? HS-COL #1030

What if Jesus Had Never Been Born? GR 7-COL #6316
D. James Kennedy, comments by many others.. The effects of Christ and the Bible around the world: Christ’s teaching of the value of every human being as made in God’s image has resulted in almost all of the organizations dedicated to the welfare of the poor and sick, and ended slavery. A belief that God’s Word was to be read by all gave us education for the masses - including females. Belief that women were likewise in God’s image elevated females from property status to having legal rights and respect. Much of the art, music and literature of the world came from Christianity and the Bible. Modern science came out of Christian thinkers who saw the universe operating under laws given by the Creator. Much more! First-rate videography, filmed on 4 continents. 2003 48 min.

Six lively, cogent arguments for Intelligent Design: artificial selection of genetic traits does not equal natural selection; peppered moths and Galapagos finches have not evolved; the woodpecker, Monarch butterfly and bombardier beetle have multiple specialized parts that ALL must work, or none is of use. Graphics are adequate. 2000 44 min.

What is the Only Answer to Racism? GR 6-COL #6326
Ken Ham. A thorough understanding of Scripture’s view of human “races” undercuts racism. Darwinism gave racism a pseudo-scientific undergirding, and a major impetus to get rid of “less-fit” people groups. Even some Christian groups have held racist beliefs, such as in a curse on all Black people, which never existed! 2000 30 min.

Where Did the Races Come From?  GR 10-COL  #6337
Ken Ham. Ken clearly explains, from science and the Bible: That all humans are descendants of one man and one woman! Who Cain married! How to use basic genetics and biblical history (such as the event of the Tower of Babel) to explain the origin of the so-called “races.” All humans basically have one skin color! Why the gospel can be preached to every tribe and nation. That the human population is divided into “people groups,” not “races.”   32 min.

Bruce Malone. Looks at the decline of Christian belief and morals from the 1940's to today, using movie clips, demonstrations, visuals, to show how our culture is being trained to reject Biblical teaching. Gives an overview of scientific evidence for the Bible being trustworthy. Shows what we can do to fight the trends in our increasingly anti-Biblical culture. 2005

*Why Death and Suffering--and Six Other Questions Christians Must Answer  HS-COL  #6050
