Continuous or regular surveys such as government censuses or official registers are especially good for such research purposes. The fact of being performed on a regular or continuous basis allow researchers to analyze the evolution of, to give an example, per capita income in Poland from 2000 to 2012. Something similar occurs when comparing different countries. Although important difference between countries may exist, the truth is that censuses and other government studies tend to unify criteria all over the world or, at least, within certain geographical areas, such as European Union, or amo...²⁷ thoughts on "Advantages and disadvantages of secondary data collection nowadays".
