Physiognomy or face-reading has been a practice for thousands of years. Ancient Greek philosophers believed in it, whilst some Chinese practice it today. The practice was dismissed around the Middle Ages due to the many con-artists using it at the time, but nowadays it has raised in prevalence and been related to many other holistic or spiritual theories. Warning: stereotypes abound, but writers may well be at fault in creating some of the common stereotypes—writers in the 1800s were influenced by physiognomy at the time, and many writers have since followed suit with fictional characters following those older villains and hero descriptions. Forehead foreheads are associated with intelligence.
