Abstract

By quantitative and thematic analysis of a carefully defined set of data this book examines Livy's caution toward the quasi-historical traditions of early Rome recorded in his first ten books, the limitations of his historical judgment, and how he tried to resolve conflicts in his sources. It also treats his religious outlook and his use of digressions and historical speeches.

"The complexity of the database is admirable and shows the length to which Forsythe has gone in order to maintain an 'objective' stance towards Livy's material. However, this is decidedly a book for the expert. It should provide a convenient starting point for professional historians and historiographers wishing to investigate Livy's working methods and his approach to the traditions of early history of the Rome."

Scholia Reviews

"F. has opened the door for further work in the neglected area of Livy's 'anonymous' citations and his authorial comments. The major contributions of Livy and Early Rome are F.'s articulation of method and the provision of analytical tools for achieving historical objectives. Their value will be confirmed by future scholarly work." *International Journal of Classical Tradition*

Titus Livius – simply rendered as Livy (/ˈlɪvi/) in English – was a Roman historian. He wrote a monumental history of Rome and the Roman people – *Ab Urbe Condita Libri* (Books from the Foundation of the City) – covering the period from the earliest legends of Rome before the traditional foundation in 753 BC through the reign of Augustus in Livy's own lifetime. He was on familiar terms with members of the Julio-Claudian dynasty and even in friendship with Augustus, whose young grandnephew, the future Judaism and Rome. Stories reflect traditional Roman ideals and values, not necessarily those of the early Romans, but rather of later periods and of Livy's own period (anachronism). 5 Livy's prologue – Events before the city was founded or planned, which have been handed down more as pleasing poetic fictions than as reliable
