Japan, Korea, Malaysia, the Philippines, Singapore, Taiwan Province of China, and Malaysia, and Thailand did better, achieving growth rates of 3-5 percent. Labor and capital, known collectively as the factors of production, refer in this

The Indonesian economy has recorded strong growth over the past few decades, and in recent years the firm pace of economic expansion has been accompanied by reduced output volatility and relatively stable inflation. Indonesia's economic performance has been shaped by government policy, the country's endowment of natural resources and its young and growing labour force. It is now the fourth largest economy in east Asia<sup>1</sup> after China, Japan and South Korea and the 15th largest economy in the world on a purchasing power parity (PPP) basis. Furthermore, its share of global output currently just under 1½ per cent is expected to continue to rise over the years ahead (Graph 2). Over time, the structure of the Indonesian economy has changed considerably.

Economic Growth and Development in Thailand. Cheap labour rates accommodated with abundance of manual labour has been a major attraction for various foreign companies to set up their industries in Thailand.<sup>3</sup> Under the administration of Prime Minister Thaksin Shinawatra from 2001-2006, Thailand adopted a dual track economy that promoted domestic stimulus programs alongside open markets and international trade.<sup>4</sup> Such measures have helped the Thai economy prosper and flourish amongst all the other South-Asian economies.

Current economic situation. AND FUTURE PROSPECTS After the crisis and the recovery phase which was until 2003, Thailand continued to show positive economic results.
