

# THE EARTHSCAN READER IN FORESTRY AND DEVELOPMENT

Edited by Jeffrey Sayer

**15%** off list price

- 'Whether you are a seasoned conservationist or forestry professional, an aspiring student or simply a concerned citizen, this book is for you' David Kaimowitz, Founding Director General, CIFOR
- Most comprehensive reader in forestry yet published: covers all sectors within this broad subject area and edited by Jeffrey Sayer, one of the world's leading authorities on forestry and development
- Maps out the complex forestry field; introduces and explains key hard-to-find literature

Arrangements for the governance and management of forests have been changing rapidly in recent decades. The post-Rio period has been one of unprecedented re-examination of what the world's forest resources consist of, who they should belong to, who should benefit from their conservation and management, and how all of this should be organized. This collection of outstanding papers on forests, development and livelihoods (until now widely dispersed throughout the literature) brings together the most recent thinking on these issues, and will give students and practitioners of forestry and natural resource management a rapid overview of what is changing, how and why. The papers provide a balanced view of subjects that have been controversial or which the media and influential decision-makers have misunderstood or misrepresented.

This book updates and supersedes the best-selling *Earthscan Reader in Tropical Forestry*, edited by Simon Rietbergen, but this time with a broader focus covering all types of forests and contexts.

**Jeffrey Sayer** is Senior Associate of WWF International's Forests for Life Programme and was Founding Director General of CIFOR (1993–2001)

## CONTENTS

Introduction • Part I: The Forest Resource • Part II: Forests and Livelihoods • Part III: Threats and Opportunities • Part IV: The Challenge of Sustainable Management • Part V: The Way Forward: Forestry for the Future • Index

Paperback ~~£24.95~~ £21.21 ISBN 1-84407-154-5 | Hardback ~~£85.00~~ £72.25 ISBN 1-84407-153-7 | July 2005

### FORESTS IN LANDSCAPES

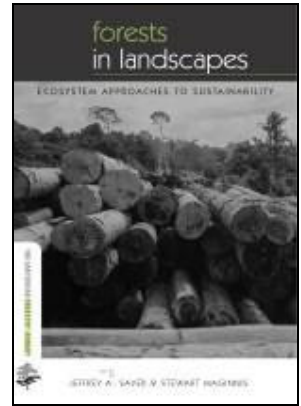

#### Ecosystem Approaches to Sustainability

Edited by Jeffrey Sayer

'At last a really useful book telling us how all the rhetoric about ecosystem approaches and sustainable forest management is being translated into practical solutions on the ground' - *Claude Martin, WWF International*

'For too long, foresters have seen forests as logs waiting to be turned into something useful. This book demonstrates that forests in fact have multiple values, and managing them as ecosystems will bring more benefits to a greater cross-section of the public' - *Jeffrey A. McNeely, Chief Scientist, IUCN*

Hb ~~£29.95~~ £25.46 (1-84407-195-2) | July 2005

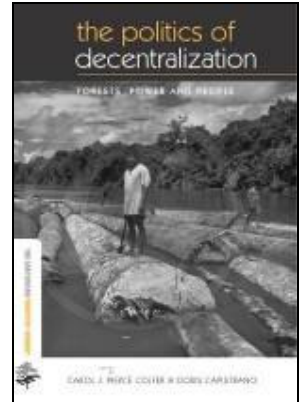

### THE POLITICS OF DECENTRALIZATION

#### Forests, Power and People

Edited by Carol J. Pierce Colfer and Doris Capistrano

'Addresses a burning global issue in forest management – how can we devolve appropriate levels of authority over forests more equitably and effectively? Based on the rich experience and insightful analysis of researchers and policy makers, this timely volume, written in accessible language, combines theory and practice [and] is required reading for policy makers and students alike' - *Jagmohan S. Maini, OC*

Hb ~~£29.95~~ £25.46 (1-84407-205-3) | June 2005
