Last month Oxford Dictionaries designated "post-truth" its 2016 Word of the Year. It defined the word as referring to "circumstances in which objective facts are less influential in shaping public opinion than appeals to emotion and personal belief." According to Oxford, it was first used in a January 1992 article in this magazine by the Serbian-American playwright Steve Tesich. Ad Policy. Tesich sought to describe what he called "the Watergate syndrome," whereby all the sordid facts revealed by the presidency of Richard Nixon rendered Americans disdainful of uncomfortable truths. The revelation Recently, Scottish First Minister Alex Salmond from the Scottish National Party, who is leading the "Yes" campaign, said that he may not agree to take on Scotland's share of the national debt if Scotland was not allowed joint control of the pound. Political Consequences. Another consequence will be the alteration of the calculus for national politics in the rest of the U.K. The Labour party has 41 members of parliament in Scottish seats while the Conservative Party has only one. If Scotland votes "yes," the light at the end of the tunnel will shine on Catalans and Basques in Spain, Flemish separatists in Belgium and the Northern League in Italy. Among others, it is highly possible that Scottish independence would embolden Catalans to secede from Spain.
