The RAND Blog. >Integrating STEM Learning in Early Childhood Education. The RAND Blog. commentary. (U.S. News & World Report). June 19, 2016. But an effective teaching system needs to be developed before STEM learning can be fully integrated into early childhood education, which relates to teaching young learners up to the age of about 8. As with almost any new initiative, one major challenge is a conceptual one: to understand the ways young children learn about STEM. How do they absorb STEM concepts? How do their differences social and economic affect learning? Does the understanding of STEM occur in a way that is similar to how a child understands basic literacy and numeracy concepts, which we know much about and can learn fro
