Philosophy of Mind: Classical and Contemporary Readings

David J. Chalmers (ed.)

Oxford University Press USA (2002)

Authors

David Chalmers

New York University

Abstract

What is the mind? Is consciousness a process in the brain? How do our minds represent the world? *Philosophy of Mind: Classical and Contemporary Readings* is a grand tour of writings on these and other perplexing questions about the nature of the mind. The most comprehensive collection of its kind, the book includes sixty-three selections that range from the classical contributions of Descartes to the leading edge of contemporary debates. Extensive sections cover foundational issues, the nature of consciousness, and the nature of mental content. Three of the selections are published here for the first time, while many other articles have been revised especially for this volume. Each section opens with an introduction by the editor. *Philosophy of Mind* is suitable for students at all levels and also for general readers.
