Hoffmann - Google Books Result An investigation of the German Novelle, in particular the relationship of the narrator to his story, and the importance of this relationship for its interpretation.

Narrative and Media applies contemporary narrative theory to media texts, including film, television, radio, advertising and print journalism. Drawing on research in structuralist and post-structuralist theory, as well as functional grammar and image analysis, the book explains the narrative techniques that shape media texts and offers interpretive tools for analysing meaning and ideology. Each section looks at particular media forms and shows how elements such as chronology, character and focalisation are realised in specific texts.
