Solid, Web Dithered, and Pattern fills can be used to fill shapes and selected areas. Gradient fills can also add to the wide variety of effects you can apply to fill an area. The Optimize panel can be used with the preview of your graphic to experiment with different optimization properties. Layers are transparent, stacked canvases in one document. Using layers allows you to create a complex graphic with independent, editable elements on the different layers. The final graphic used on the Web must be flattened and exported as a .gif or .jpg file. About PowerShow.com. PowerShow.com is a leading presentation/slideshow sharing website.
