Quality management systems -- Specific requirements for the application of ISO 9001:2015 by organizations in the supply chain of the nuclear energy sector supplying products and services important to nuclear safety (ITNS). 60.60. ISO/TC 85. ISO 22870:2006 [Withdrawn]. Point-of-care testing (POCT) -- Requirements for quality and competence. 95.99. ISO/TC 212. Representing the first international effort to formulate a quality management system standard for the aerospace industry, the two-year-old AS9100 is beginning to show its long-term value. The standard supplements ISO 9001 by addressing the additional expectations of the aerospace industry. As such, it combines and harmonizes requirements outlined in the SAE's AS9000 and Europe's prEN9000-1 standards. Recently, AS9100 was revised to align with ISO 9001:2000. Separating "whats" from "how tos". The industry experts who wrote the standard and the representatives who approved it all agree that these additions are essential to ensure product, process and service safety and quality. He serves as an aviation safety consultant for the Federal Aviation Administration and FIT. An IS-BAO Certified Safety Auditor, he provides safety evaluations in accordance with Federal Aviation Regulations. His services are available nationally and internationally and include written reports, depositions, and trial testimony as needed.
