(INTRODUCTION) 1 Plenty of intellectuals in variety of field and officials in government have posed issues about growing environmental problems on earth and global warming and presented solutions. 2 Glaciers are rapidly melting every year. 3 Contamination of drinking water, increasing temperature, air pollution, polluted soil problem, people have already well known of these. 12 There a bunch of young girls go to brothel at teen-age and boys spending most of their time in laborious work in the factory at low wage. 13 If officials in underdeveloped should take measures on something, they will give more priorities to economic growth as what they need now is getting out of those miserable situations. 7 Nonetheless those stubborn officials and intellectuals insist on saving the Earth. Current environmental problems make us vulnerable to disasters and tragedies, now and in the future. We are in a state of planetary emergency, with environmental problems piling up high around us. Unless we address the various issues prudently and seriously we are surely doomed for disaster. Current environmental problems require urgent attention. Global warming leads to rising temperatures of the oceans and the earth's surface causing melting of polar ice caps, rise in sea levels and also unnatural patterns of precipitation such as flash floods, excessive snow or desertification. 3. Overpopulation: The population of the planet is reaching unsustainable levels as it faces shortage of resources like water, fuel and food.
