Arms: on line hemodiafiltration vs high flux hemodialysis. Primary outcome: tolerance of online HDF in terms of adverse events occurring during dialysis sessions. Randomised Study of High-flux Haemodialysis and Haemodiafiltration [57]. Hemodialysis: Techniques and Prescription. T. Alp Ikizler, MD, and Gerald Schulman, MD. INTRODUCTION. HEMODIALYSIS (HD) is the routine renal replacement therapy for more than 300,000 patients in the United States who have reached end-stage renal disease. The goals of HD are straightforward and include restoring the body's intracellular and extracellular fluid environment and accomplishing solute balance by either removal from the blood into the dialysate or from the dialysate into the blood. 8. Simmons EM, Weathersby BB, Golper TA, Collins AJ: High-flux, high-efficiency procedures, in Henrich WL (ed): Principles and Practice of Dialysis (ed 3).
