Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language. Table Of Contents. HTML & CSS Is Hard. But It Doesn't Have To Be. A friendly web development tutorial for complete beginners. Front-End Developer Handbook 2017 (cover image). Front-End Developer Handbook 2017. Learn the basics of writing HTML and CSS code here! In this tutorial I cover setting up your first page and linking it to an external style sheet using CSS. I also start to begin to style the page. This is a very fast tutorial, but if you follow along you begin to see the patterns and I go over some of the more confusing elements in detail. Be sure to check out <http://www.neacedesign.com> for more about me! Thank you!!! name. Welcome to HTML Basics. This workshop leads you through the basics of Hyper Text Markup Language (HTML). HTML is the building block for web pages. You will learn to use HTML to author an HTML page to display in a web browser. Objectives: By the end of this workshop, you will be able to: Use a text editor to author an HTML document. Style sheets (CSS) should be used instead (to define the layout and display properties of HTML elements). Try It Out! Open your text editor and type the following text: My First Webpage. Welcome to my first webpage. I am writing this page using a text editor and plain old html. By learning html, I'll be able to create webpages like a beginner pro. which I am of course. Save your page as mypage3.html and view it in your browser.
